

ROLLER BLINDS | *Discover style*

Pure Essence

Timeless beauty in flawless white

| | |
|--------------|----------------------|
| Blind | FACES 3-2344 |
| Hardware | R_03 bracket |
| Installation | Ceiling installation |
| Drive | Operating chain |

Clean, light, open and honest: the colour white, always a byword for purity and elegance, is more popular than ever today. Not only does it make rooms appear larger, it also creates an atmosphere that is calm and uncluttered. Choose from cool prints, sophisticated weave structures and various levels of transparency.

Minimalism in black and white: *FACES* is a wonderful blind with fine lines resembling a portrait. It is a real must-have statement blind that is sure to fit seamlessly into your interior design while giving it a contemporary, artistic edge.

Wooden Styles

Cosiness is on trend

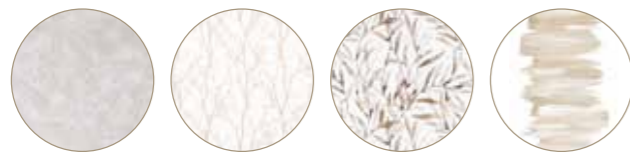

Warm beige tones and cool prints give your home a touch of lightness, relaxation and feel-good flair. And this means Wooden Styles is the perfect partner for today's boho trend - characterised as it is by wood, soft colours and natural materials such as macramé and linen.

The shaft mounting profile is an incredibly minimalist installation solution, with the roller blind integrated flush into a ceiling shaft so the hardware disappears into the ceiling, becoming practically invisible.

An eye-catching feature with a natural look, the **TESSA** pattern will captivate you with its unusual mixture of geometric shapes and leaf line art.

Industrial Grey

Inspiration for living in shades of grey

| | |
|--------------|----------------------|
| Blind | OBITO 3-1209 |
| Hardware | R_03 bracket |
| Installation | Ceiling installation |
| Drive | Electric |

Industrial Grey: more patterns

Neutral and yet so diverse, the colour grey stands for quality and elegance - whether it's anthracite, concrete or greige. It brings balance, blends contrasts and is an indispensable tool when designing on-trend loft apartments or Scandi-chic spaces.

OBITO is a stunning blind that offers a transparent airiness and amazing light effects. With its finely shaded circles, the pattern creates a welcome counterpoint to the straight lines found in the rest of the room.

Greenery & Oceancy

Harmonious colours of the sea

Experience for yourself the sense of harmony created by aqua tones in blue and green. These colours guarantee balance and calm, making them ideal for the bedroom or a corner of the lounge, where they will create a relaxing sanctuary away from the stresses and strains of everyday life.

Cosiness with a Japandi look: *HARO* just oozes stylish tranquillity and is set off to stunning effect when paired with light wood.

Bright Sunset

For a living space full of charm and romance

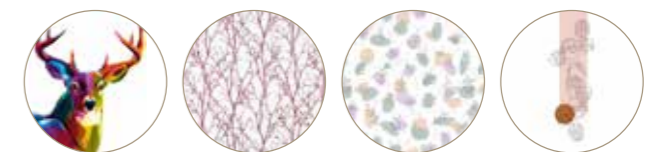

| | |
|--------------|----------------------|
| Blind | DONNA 4-2587 |
| Hardware | R_03 bracket |
| Installation | Ceiling installation |
| Drive | Electric |

The perfect style for all those romantics who want to surround themselves with warm colours. Bright Sunset is sure to put you in a good mood with its gorgeous shades of red, orange and yellow, while giving your home a cosy feel at the same time.

DONNA - a pretty, feminine statement in an opulent blaze of colour. Prepare to be enchanted!

MHZ Exclusive fabrics

An array of shimmering fabrics in 34 colours

You only have to see the light shining softly through our MHZ Exclusive fabrics and you will understand what is so special about these subtly iridescent blinds. This range is made up of high-quality textiles produced exclusively for MHZ, which look absolutely stunning and come in an impressive selection of 34 colours. You can choose from three different transparency levels (transparent, semi-transparent, blackout) per shade.

All Exclusive fabrics are made from 100% PES Trevira CS whose fibres have been modified to ensure they are flame-retardant.

Green Stories

Recycling at its most beautiful

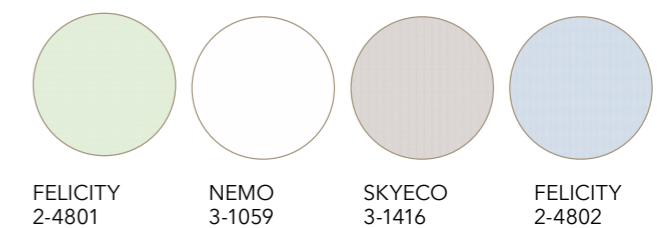

| | |
|--------------|----------------------|
| Blind | SEA-TEX® 4-2292 |
| Hardware | R_04 bracket |
| Installation | Ceiling installation |
| Drive | Operating chain |

Our MHZ Green Stories are sustainably produced fabrics made from up to 100% recycled materials - and they are making their mark on the environment of tomorrow.

Each fabric has its own unique back story. They are stories from near and far - stories of plastic waste that is collected from shorelines and turned into yarn for our roller blind fabrics. Stories of fishermen and local environmental groups cleaning up plastic waste from rivers, beaches and seas. And stories of PET bottles that are used to make new textiles. The result is a range of very special products: roller blinds with their own style, character and a moving back story, which feel unique to the touch and have a fantastic texture. That is Green Stories.

Glare protection on demand

Versatile management of light in the workplace

Natural daylight promotes a feeling of well-being and puts people in a good mood. However, there are some situations where it may be unwanted, such as when giving a presentation in a conference or meeting room.

MHZ dimout functional fabrics can be relied upon to dim the daylight when required. They have a coating on the back that reflects both the sun's rays and the heat, allowing people to work without being dazzled by the sun. When choosing your fabric, just bear in mind that the lower the transmittance of the fabric, the more effective its glare protection.

Dimout roller blinds not only give you privacy protection and optimum lighting conditions, but also a wonderfully cosy ambiance to boot.

*PG 5 + 25%

Whether people are working in the office or from home, a pleasant working environment has a huge impact on their health, productivity and motivation. And having the right sun protection is crucial here.

Our intelligent screen fabrics strike the perfect balance between providing excellent glare protection and getting the most out of the available daylight - all while allowing people to see outside with no problem. You can look forward to being able to focus on your computer work in bright, pleasant surroundings. With no headaches or strained eyes.

We have more fabric variants that have additional functional properties for even more comfort: SOLTIS TOUCH absorbs up to 45% of sound, while SOLTIS 99 comes with a membrane with an antiviral finish for when there are special hygiene requirements to meet in public buildings.

The blackout experts

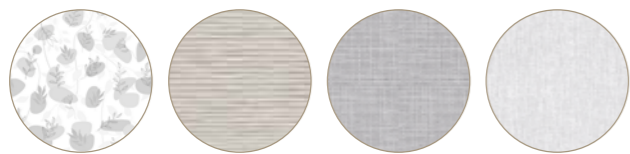

Sleep well day and night

MHZ blackout functional fabrics are almost opaque and offer - when used in conjunction with the appropriate roller blind hardware - excellent blackout properties. So nothing will stand in the way of you and a stress-free sleep. What's more, they are energy-efficient, cool things down on hot days and protect you from prying eyes.

Innovative hardware paired with a modern, minimalist look, our R_04 roller blind with ZIP and side guide profile is the ideal solution if you want to black out your rooms completely. This model is also incredibly resistant to draughts, thanks to its fixed fabric guide.

windows that are up to 6 meters wide (20 m²) - ideal for an agency space, a loft or a conservatory.

More room for individuality

Model overview of the MHZ R_family

With the introduction of the R_03, R_04 and R_05 roller blind models, the MHZ roller blind system has now become the roller blind family. Similar hardware, components and types of operation and installation are used across all model variants, just like in any modular system.

Thanks to their practically identical design language, all MHZ R_models can be mixed and matched with ease, enabling them to fulfil even more needs and architectural requirements within a room.

Model overview
