Elements

EARTH, WATER, AIR, FIRE

Ever since ancient times, the natural phenomena of earth, water, air and fire have represented the foundations of all life. The four elements are the original sources of natural power, and have a great influence on human beings' inner balance and health. As symbolic decors for the DUETTE® honeycomb blinds, they combine perfect protection from the sun with a refreshing, soothing look. The blinds in the Elements collection by sieger design incorporate a powerful statement into a harmonious interior design scheme.

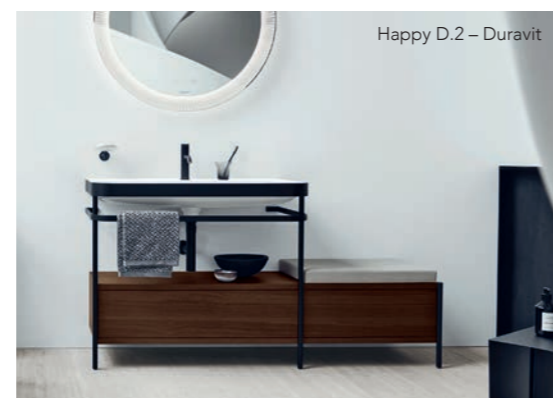

Christian and Michael Sieger

Rollfire – Conmoto

SIEGER DESIGN CREATES POETIC ICONS

The Elements collection from DUETTE® features several hallmarks of sieger design's characteristic style. The agency has over 35 years' experience in design and decoration. The family company, now in its second generation, is run by the brothers Michael and Christian Sieger. Michael is a designer who has created icons of tableware and bathroom design. "Our agency's design style is at once archetypal and functional, poetic and life-affirming," he says. Michael and his design team have won numerous international awards for their work. Christian devotes his energy to professional marketing of sieger design's products and brand concepts.

Happy D.2 – Duravit

Tara – Dornbracht

"At sieger design, we understand innovative design as an overarching creative vision. Our design process always begins with a precisely tailored, thoroughly researched strategy. Each new project is approached with a keen eye for timeless, often archetypal forms, superlative technical finesse and artisanry, and a flair for functionality, innovation and sustainability. The products we develop stand out for their distinctive style and long lifespan. The enduring success of many of our collections for national and international companies is testament to our approach. Our instinct for trends allows us to tell when it's time for a new idea – like Elements."

LAMY scala – Lamy

MHZ DUETTE® honeycomb blinds are made to measure and manufactured in Europe.

Blinds, sunshades and insect screens

EVERY MHZ PRODUCT IS A TRUE ORIGINAL.

We're an independent family business with over 90 years' experience developing and manufacturing blinds, sunshades and insect screens. MHZ products are custom-made and offer a blend of innovation, quality, sustainability and stylish design. Working with passion and meticulous attention to detail, we pair superb craftsmanship with pioneering ideas. In line with these high standards, we decided to expand our collection of DUETTE® honeycomb blinds, working with multi-award-winning agency sieger design to create a reinterpretation of Michael Sieger's Elements collection for our blinds. The resulting collection fuses form and function and allows you to add impressive flair to your home.

Earth

THE POWER OF EARTH

The element of earth is rich in energy and forms the basis for all natural growth. In the decor for the Elements collection, it's represented by colourful triangles that are swirling round as if blown by a powerful gust of wind.

Water

THE BLUE ELEMENT

Water is the source of all life on our planet. In the Elements collection, it's symbolised by a pattern of abstract corals in refreshing blues, which are slowly floating up to the surface of the water.

Air

THE FEELING OF FREEDOM

The design for the element of air is inspired by elegant Chinese porcelain painting, but with a modern twist. It shows birds gliding serenely over a landscape full of flowers.

Fire

PURE LOVE OF LIFE

The element of fire is characterised by energy, passion and warmth. In the Elements collection, it's represented by a colourful explosion of geometric stars – a typical Sieger design hallmark.
