

MHZ VENETIAN BLINDS | *Light modulation to perfection*

Quality and customisation in every respect ensure that you can continue to enjoy our products for many years to come.

Fine craftsmanship and the latest technologies ensure durability, guarantee flexibility and enable easy installation.

Custom solutions. Excellent custom work.

The name MHZ has been associated with sun protection that meets the highest standards since 1930. MHZ venetian blinds, which are among the classics for interior and lighting design, are also associated with the same standards. As with all sun protection solutions produced by our company, the perfect interaction of high quality, striking designs and pioneering technology sets MHZ venetian blinds apart. As an ideas factory, here at MHZ we attach great importance to solutions that are one step ahead, while also offering sustainability and durability. We value innovation and traditional craftsmanship. So our ideas and solutions are well thought out down to the smallest detail, guaran-

teeing premium quality and "made in Germany" production. MHZ venetian blinds combine all aspects of modern living: sensory yet practical aesthetics and a distinct flair for technology that make the good even better and the fine into the finest - for the best, and exactly the right, solution to meet your requirements.

Our company's motto is this: every MHZ product is manufactured individually to customer requirements. As tailor-made solutions for the perfect light modulation, MHZ venetian blinds add a personal touch to windows and spaces in various settings. The following pages will introduce you

Customised and tailor-made solutions make MHZ venetian blinds stand out everywhere - in everyday life and at work.

MHZ venetian blinds always offer that something special: from suitability for use in wet rooms to invisible punched holes.

MHZ venetian blinds combine classic beauty with modern design. Timeless in any setting.

to the versatile world of MHZ venetian blinds. The range of solutions, which are both stunning and suitable for everyday use, is huge. A variety of possible uses and versatile properties distinguish each solution.

They provide shade and control the amount of light shining in without restricting the view of the outside world, provide privacy protection and glare-free illumination - in kitchens, living areas and bedrooms, bathrooms, offices and at computer workstations, on vertical tilt & turn windows, skylights, special window shapes, for glazing, glass façades or even partitions. Five different operation

options provide the greatest possible convenience to suit your requirements and the architectural elements that are in place. Four different slat widths, 20 different surface textures and over 133 colour combinations blend in with modern living trends and highlight the custom interior style.

MHZ venetian blinds impress in a variety of environments as attractive lighting and interior design elements that reflect the spirit of modern times, but with a classic look.

MHZ VENETIAN BLINDS | *Convenient operation*

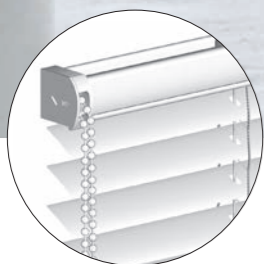

Model	09-1355
Technical information	Electric drive 230 V
Blind	1-716, DIM, grey
Slat	50 mm

Multiple operation options. Each one effortless.

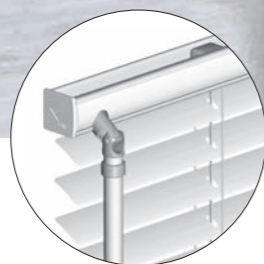

Five operation options ensure maximum choice and convenience, so you can regulate the amount of light shining in and control light effects easily and conveniently. Each one is extremely well designed and manufactured, so it will continue to function perfectly for many years to come - even in the case of large, very tall blinds. The chain pull and crank operation raise and lower the blind, while also tilting the slats.

Those who love even more convenience and luxury should choose the electric drive. Here, you have various control options with the lock switch, remote radio control, sun sensor or timer.

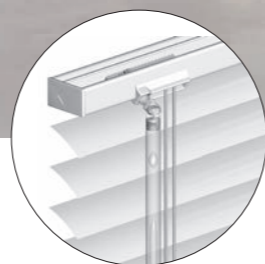

The MHZ TwinLine freely adjustable venetian blind is an extraordinary MHZ solution with a rotary wheel integrated into the operating handle on the head rail to tilt the slats.

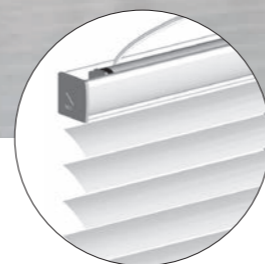

Chain operation

Electric drive

Operation on head rail and/or bottom rail

Model	09-8180
Technical information	TwinLine ^{new}
Blind	2-704, PURE, black
Slat	25 mm

Convenient sun protection for your window

Experience the new generation of the TwinLine^{new} freely adjustable MHZ venetian blinds. An innovative operating concept now enables slat tilting both from the top and the bottom. For an even better quality of life at home!

The key element here is the high-quality rotary handle with its minimalist design. It combines the ultimate convenience with an exclusive look and, together with the rail, forms a harmonious unit.

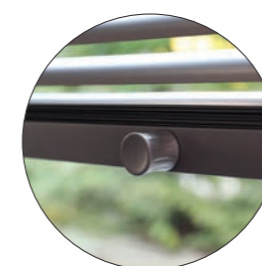

The handy rotary handle on the head rail and bottom rail is the central control element for the venetian blind. Position the blind in any chosen position and control the amount of light shining in easily with the integrated, continuous swivel function.

Another TwinLine version enables the slats to be tilted conveniently on the head rail, while moving the blind vertically using a fixed handle on the bottom operating rail. This version is recommended for easily accessible windows.

The adhesive set with side guide makes both versions of the TwinLine^{new} even more convenient. The moveable rail suspension causes the operating rail to tilt when the blind is moved using the handles and follows the natural movement of the hand.

Product benefits | TwinLine^{new}

- Perfect privacy, glare and sun protection
- Innovative operating concept for even simpler handling
- Consistent design applied to rotary handle and rails
- A range of assembly options for installation without drilling or screwing as required
- Installation in the glazing bead: windows can be opened and closed without any need to operate the blind

Especially practical:

The additional rotary element on the bottom rail means blinds can now be operated comfortably and conveniently, even on high windows or windows that are difficult to reach.

BATTERY-OPERATED RADIO DRIVE 12 V | *Perfect for combining*

Model	09-7170
Technical information	TwinLine
Blind	2-815 NETWORK, gold
Slat	25 mm

Model	09-1185
Technical information	Battery-operated radio drive 12 V
Blind	2-815 NETWORK, gold
Slat	25 mm

Easy operation, precision adjustable

The SITUO radio remote control enables convenient single, group or central operation of one or more drives or radio receivers. This means you can control your blind systems comfortably and adjust them to your individual requirements. Even sun protection systems that are difficult to reach, for example behind the sofa or some distance away, can be operated conveniently. Some versions also feature an impressive user-friendly scroll wheel and a slide switch to easily enable and disable central operation.

Even installation is incredibly easy: there is no need for power and control wires to be installed, so no damage to plaster and no dirt.

Precision adjustment any time

The new SITUO RTS II Pure version of the Somfy radio remote control with adjustment wheel provides maximum convenience for the precision adjustment of slats. A pleasant feel makes this modern technology impressive. The elegant, unobtrusive design blends perfectly into modern blind systems.

Product benefits | *Battery-operated radio drive 12 V (max. surface 5 m²)*

- Convenient operation of multiple drives or radio receivers
- Extremely convenient to finely adjust the slats
- The latest technology and an attractive look
- The perfect fit for modern blind systems
- Operation of difficult to reach blind systems made easy via remote control unit

The adjustment wheel is fitted as standard in the SITUO 1 RTS II Pure version and the SITUO 5 RTS II Pure version radio remote control and enables easy operation and precision adjustment of the blind system

Model	09-1165
Technical information	Electric drive 18 V
Blind	2-546 BRUSH, gold
Slat	25 mm

Product benefits | *Battery-operated radio drive 18 V Power-View® (max. surface 5 m²)*

- Simple sun protection control at the push of a button
- Can be used across different products
- Pleasant feel
- Room scenarios can be programmed with optional scenario controller
- Available in ten modern colours

The intelligent sun protection control

Your intelligent sun protection. Allow daylight in, block sunlight out or enjoy privacy protection. One click and your venetian blinds do exactly what they should. Control your sun protection quickly and easily at the touch of a button.

The Power-View® Pebble remote control is the shape of a palm stone. The stylish design is available in ten modern colours.

Pebble® (with remote control*)

Pebble® scenario controller and wall-mounted controller

With the optional scenario controller*, room scenarios can be programmed and controlled automatically for the entire house.

* Remote control and scenario controller available in white or black.

ELECTRIC DRIVE 24 V | *Convenient control*

Model	09-1165
Technical information	Electric drive 24 V
Blind	3-805 FROSTED, silver
Slat	25 mm

Product benefits | *Electric drive 24 V, max. surface 9 m² (with two central motors)*

- Suitable for blind systems of up to 9 m²
- Up to 11 drives can be controlled
- Convenient operation of venetian blinds
- Various control options possible
- Single or group control possible

Convenient control of large blind systems

With the 24 V motor, even blind systems of up to 9 m² can be controlled - making it particularly suitable for blind systems on large glass façades, for example in lounges. The group power supply even enables the convenient operation of up to

11 drives, so the 24 V drive is especially practical for operating venetian blinds. The various control options, via lock switch, remote radio control, sun sensor and timer, also promise a touch of modern luxury.

Model	09-3118
Technical information	Rotary wheel
Blind	2-781 BRUSH, silver
Slat	25 mm

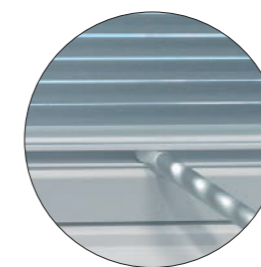

Major challenges.
Mastered with style.

Skylights set high standards for the perfect solution. And MHZ venetian blinds for skylights meet them with ease. The elegant side guide profiles keep the blind stable. The bottom rail makes the blind easy to move and ensures it can be secured in any desired position.

Turn the slats conveniently with a rotary wheel or with an operating rod for skylights that are difficult to reach. You can regulate the amount of light shining in and protect against incident sunlight even more conveniently to suit your individual needs – the perfect solution for all common skylight types.

Product benefits | *Blind systems for skylights*

- Operation on the bottom rail
- Slat tilting with operating rod
- 25 and 35 mm slat width possible
- Suitable for all common skylight models
- Elegant side guide profile keeps the blind stable

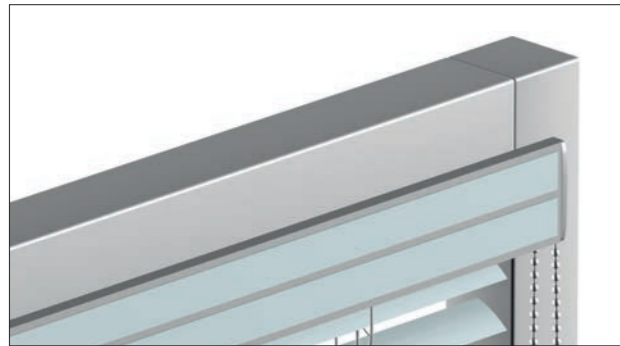

Operating rod (optional) for tilting slats and for moving the blind on skylights that are difficult to reach.

INLINE | *Emphasis on window sashes*

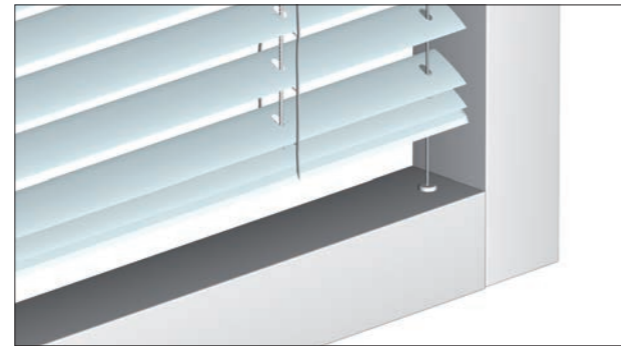

Stunning look. Invisible installation.

MHZ InLine is installed on the window sash of side-hung and tilt windows directly. It fits flush to any glazing bead form, regardless of whether it runs at an angle or straight. A transparent operating chain raises and tilts the blind and slats as required. The venetian blind can be secured in any desired posi-

tion. Every little detail is well-thought-out and finely crafted, so you can continue to enjoy our product for years to come. MHZ InLine is ideal for lounges, kitchens and bathrooms, where frequent and easy opening and closing of the window needs to be possible without having to operate the blind.

MHZ InLine makes a stunning, eye-catching feature, whether large or small. The mounting screws are concealed by the slats inserted in the bead rail.

You can open and close any window without the need to operate the blind. The side guide ensures that the blind is guided and remains evenly tensioned even with the window tilted.

Product benefits | *InLine*

- Concealed installation directly on the window sash
- Ideal for windows that are opened and closed frequently
- Blind is lowered, raised and tilted by operating chain
- 16 and 25 mm slat widths possible

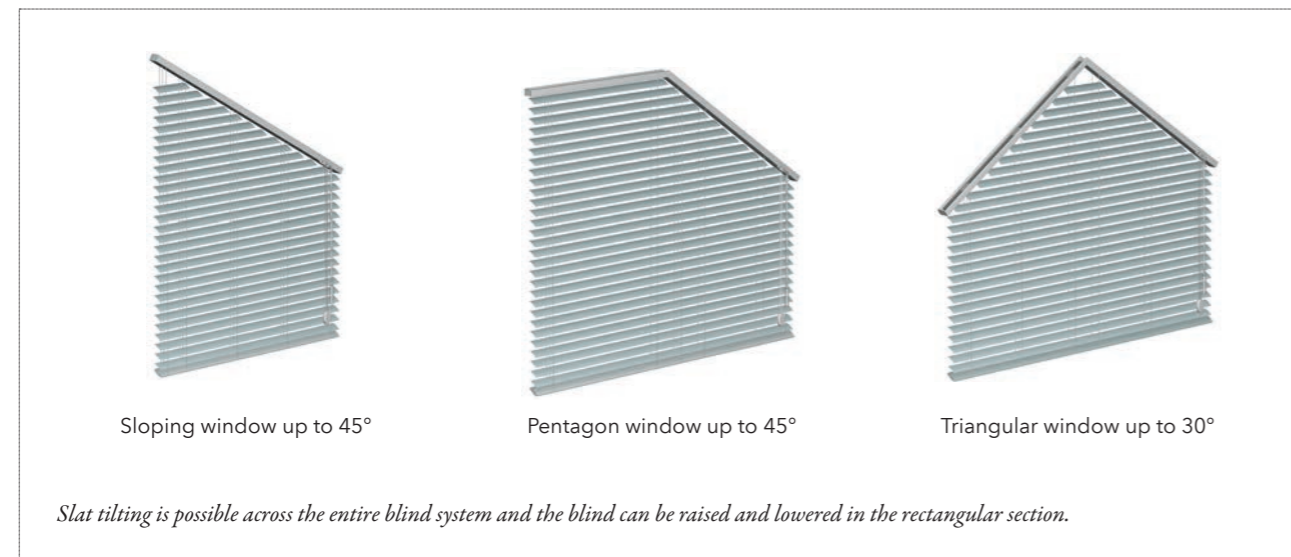

Model	09-1156*
Technical information	InLine
Blind	OBSCURE, 3-502, white
Slat	25 mm

MINI | *Filigree elegance in any shape*

Beautiful design. For all special shapes.

MHZ MINI venetian blinds speak almost any interior design language with ease. The striking feature is the filigree head rail, virtually invisible in silver or white, which creates a subtle highlight in the room and at the window, making the blind look like it is floating. But quite apart from the delicate design, the technology is impressive too:

you can tilt the slats incredibly easily with a transparent acrylic rod. Your blind can be operated outwards from the left or the right with a pull cord that can be easily secured in place with a cord brake. MHZ MINI is also the perfect technology for use on special window shapes.

The MHZ MINI filigree head rail, at just 16 mm in height, is almost "invisible".

Product benefits | *Mini*

- Filigree head rail
- Pull cord and wand operation
- Suitable for special window shapes
- 25 mm slat width possible

MHZ VENETIAN BLINDS | *Focus on perfection*

Model	09-8180
Technical information	TwinLine <small>new</small>
Blind	2-703 PURE, anthracite powder-coated
Slat	25 mm

All-round impressive.
Even at computer workstations.

Modern computer workstations set particularly high standards for light protection and light modulation, standards that MHZ venetian blinds meet perfectly. Flexible slat control is also important here so they can be adjusted in line with the different positions of the sun. This then ensures that the desired light modulation, privacy protection and even blackout requirements can be met.

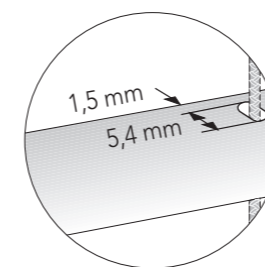

Whether in the office or working from home, slat blinds create a practical and functional atmosphere. Their filigree style fits beautifully into any linear architecture and a minimalist interior design style.

The invisible punched holes are a definite benefit. They are already an impressive feature in standard blind systems, as they prevent annoying spots of light. And these are exactly the kinds of benefits that you will also come to appreciate in seminar rooms when using projectors or watching television.

121

Product benefits | *Blind systems for home and office*

- Ideal for computer workstations
- Perfect room partition
- Cleverly screens rooms
- Impressive design and functionality
- Invisible punched holes prevent annoying spots of light (does not apply to TwinLine models)

*Invisible punched holes (except for TwinLine models):
The punched holes have been set to the back.
This makes them invisible when the blind is closed.*

For uninterrupted communication

MHZ venetian blinds are the perfect choice as room partitions and for privacy protection in modern communication and working environments. Both aesthetically pleasing and extremely functional, they become an integral part of the interior design. MHZ venetian blinds cleverly screen rooms -

from prying eyes, light shining in and sunlight. The flexibly tilting slats can be adjusted ever so finely, thereby giving unobstructed views and ensuring a pleasant atmosphere for discussions and work in any environment.

Product benefits | *Blind systems for offices*

- Can be used as room partitions and dividers
- Privacy thanks to flexibly tilting slats
- Desired light modulation possible
- Adjustment in line with the sun's position through to total blackout
- Also ideal for doctor's surgeries and practice rooms

The aluminium slats

Thermal treatment makes the hard aluminium slats extremely resistant and durable, so they are appropriate for all private and public spaces. They are suitable for a variety of applications, as perfectly emphasised by their on-trend metallic colours.

The European-made slats also contribute to the sustainable conservation of raw materials: they are manufactured from up to 98 percent recycled materials.

Slat widths

Different slat widths are not just for appearance and look. They have a distinct and important function. The right slat width can create an effect that is perfectly matched to the specific room and win-

dow format, furnishing style, environment, amount of light entering the room and intention - whether privacy protection, glare protection, or opaque and impenetrable blackout conditions.

Refined in format, refined in appearance.

The 16 mm slat width decorates narrow windows, ribbon windows and stairways. It is perfect for shallower glass rebates and unit widths of up to 270 cm max.

16 mm

Simply perfect everywhere.

As a practical and beautiful solution, the 25 mm slat width is a classic all-rounder that can be used everywhere. Even for unit widths of up to 390 cm.

25 mm

Special tasks require special solutions.

The 35 mm slat width is specially designed for larger glass façades and skylights. This is where its skills really come into play. It is particularly effective for unit widths of up to 450 cm.

35 mm

Especially for large rooms, formats and dimensions.

The 50 mm slat width sets off and highlights the effect of glazing and glass façades perfectly. Even for unit widths of up to 500 cm.

50 mm

MHZ VENETIAN BLINDS | 2019 Collection

Metallic trend and a tactile experience

Cars with white gloss or silver matt paint finishes, mobile phones with a golden back cover or changing metallic-coloured wristwatches: the metallic trend is everywhere in day-to-day life.

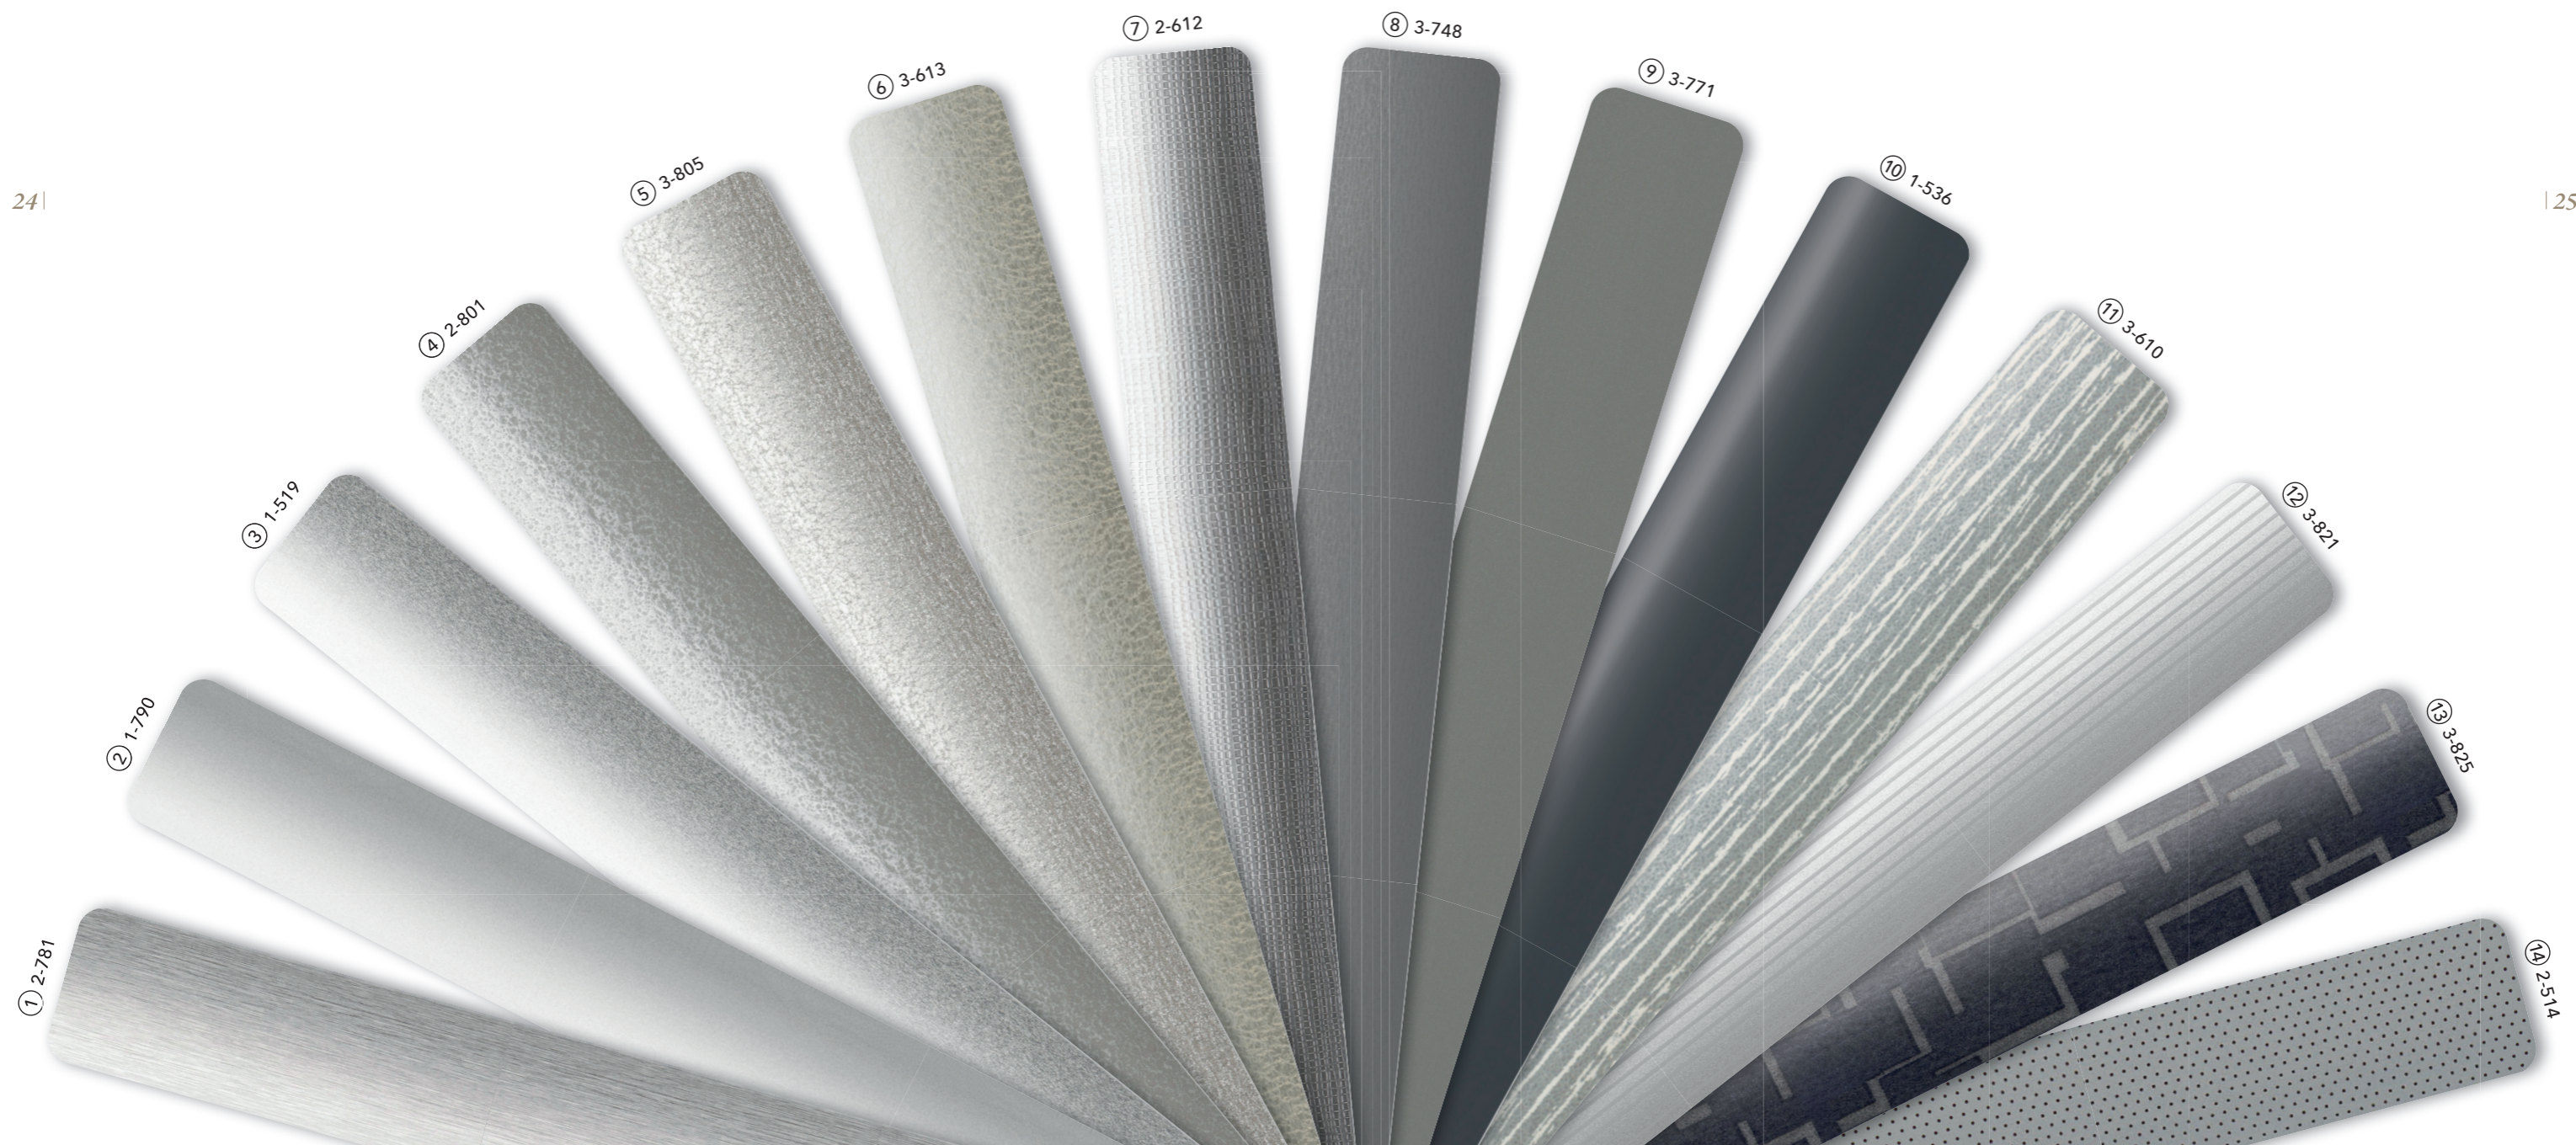

The MHZ venetian blind collection transfers this trend to privacy and sun protection. The metallic finish creates visual, tactile and functional highlights. In addition to the pleasing look, the blinds also feature technical product characteristics.

A range of different shades of white, matt silver and rose gold: these are just some of the huge choice of metallic colours in the slat collection.

Satin matt or brushed finishes and hammer-blow effects create exciting highlights. Frosted, crushed or embossed textures and concrete, gloss or soft-touch effects make the slats appear tactile. High-contrast graphic designs and functional slats complete the range.

- ① **BRUSH** | Slat 16/25/35/50 mm · 7 colours
Brushed finish from white and rose gold to silver

- ⑭ **MESH** | Slat 25 mm · 4 colours
For superb visibility, in white, silver, grey and black

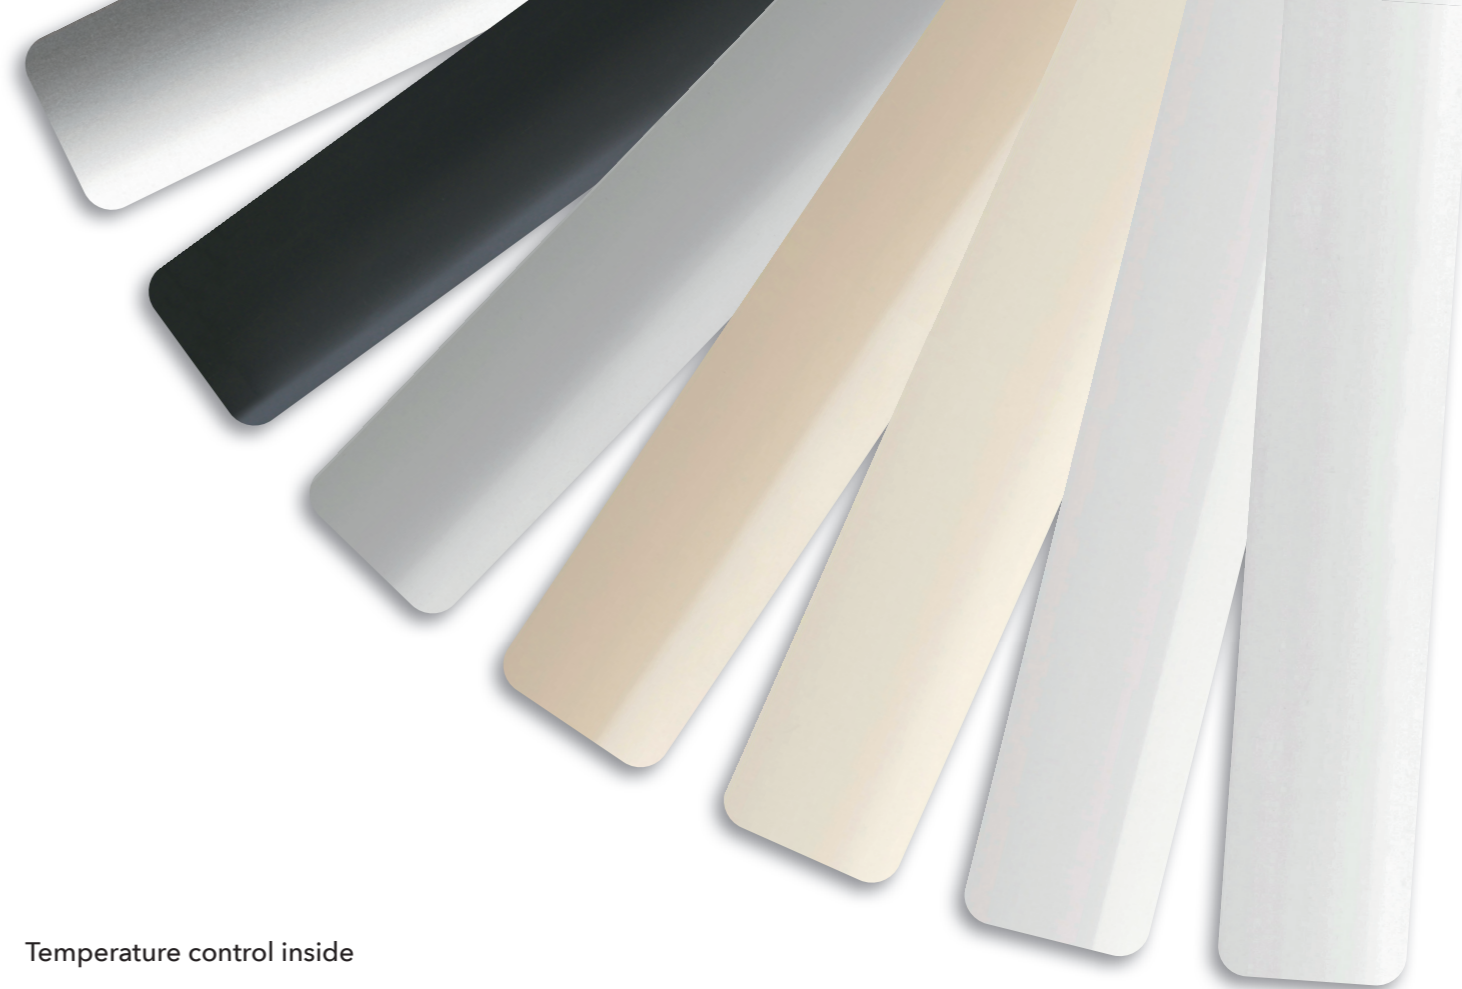

MHZ VENETIAN BLINDS | *2019 Collection*

For colourful accents

The DIM satin matt slat gives lovers of colourful statement accents a huge choice of colours and therefore a variety of design options: add highlights to your own home to suit your personal taste with venetian blinds in your preferred choice

of colour - for more individual flair within your own four walls. In addition to classic contemporary colours in all four widths, the 25-millimetre slat is available in a total of 32 colours, which can be combined in a single blind.

26 |

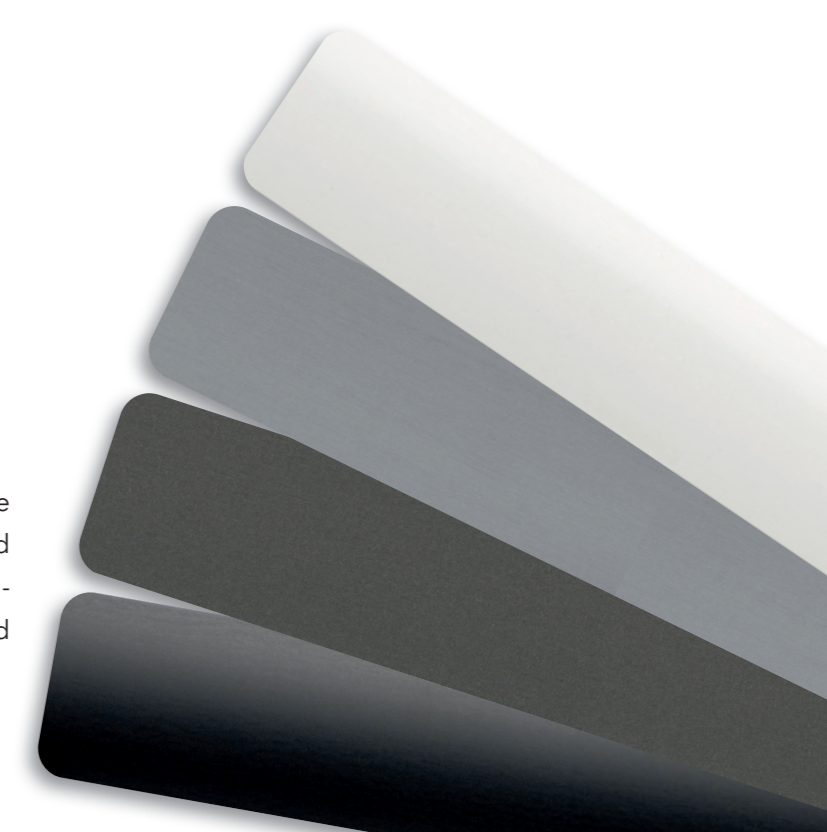

Temperature control inside

The Thermostop® slat is a high-performance, coated product that helps save energy thanks to its concave outer. The slat increases thermal stability in winter and reduces heat transmission indoors in summer. Unlike a standard venetian blind slat, this slat has a special coating on the concave side, resulting in three times lower heat emission (emission value of 30%, as opposed to 90% with a normal painted or varnished slat). Thermal radiation is essentially reduced by up to 90% and thermal insulation is improved by up to 20%.

| 27

Colour coordinated down to the last detail

With the exclusive PURE slat, you can match the horizontal slats to the profile colours of MHZ blind systems. Available in silver, white, black and anthracite, they come in four widths of 16, 25, 35 and 50 millimetres.
