DOUBLE ROLLER BLINDS

A close-up photograph of a window blind with woven stripes. The blind is partially open, showing the alternating black and white woven fabric. The background is a soft, out-of-focus light blue. The text is overlaid on the left side of the image.

# Light Regulation through alternating black out and transparent woven stripes

## MHZ DOUBLE ROLLER BLINDS

---

### New dimensions in Sun Protection

Textile aesthetics combined with the function of being able to flexibly adjust sun protection, light protection, and privacy protection, which are the requirements for high quality and comfortable sun protection at the same time.

The MHZ Double Roller Blind Look\_2 meets the requirements excellently with its alternating black out and transparent woven stripes in fabric webs and are re-directed via a weighted rod resulting in double fabric webs.

The finest graduations between the black out and transparent stripes of the hanging can be adjusted with the help of the operation. The results are different transparencies and a stripe or wave look, that can be regulated individually.

Be it living area, kitchen, bedroom, bath or home office, the MHZ Double Roller Blind Look\_2 is the perfect product when textile decoration simultaneously fulfils the function of sun protection.

| 3

- 
- tailored, textile decoration combined with the function of sun protection
  - individual and flexible sun protection, light protection, and privacy protection adjustment
  - refined 3-D-effects - which creates a constantly changing and lively hanging
  - slender bracket aesthetic and beautifully designed head rail
  - easy installation

Colour	white, nature

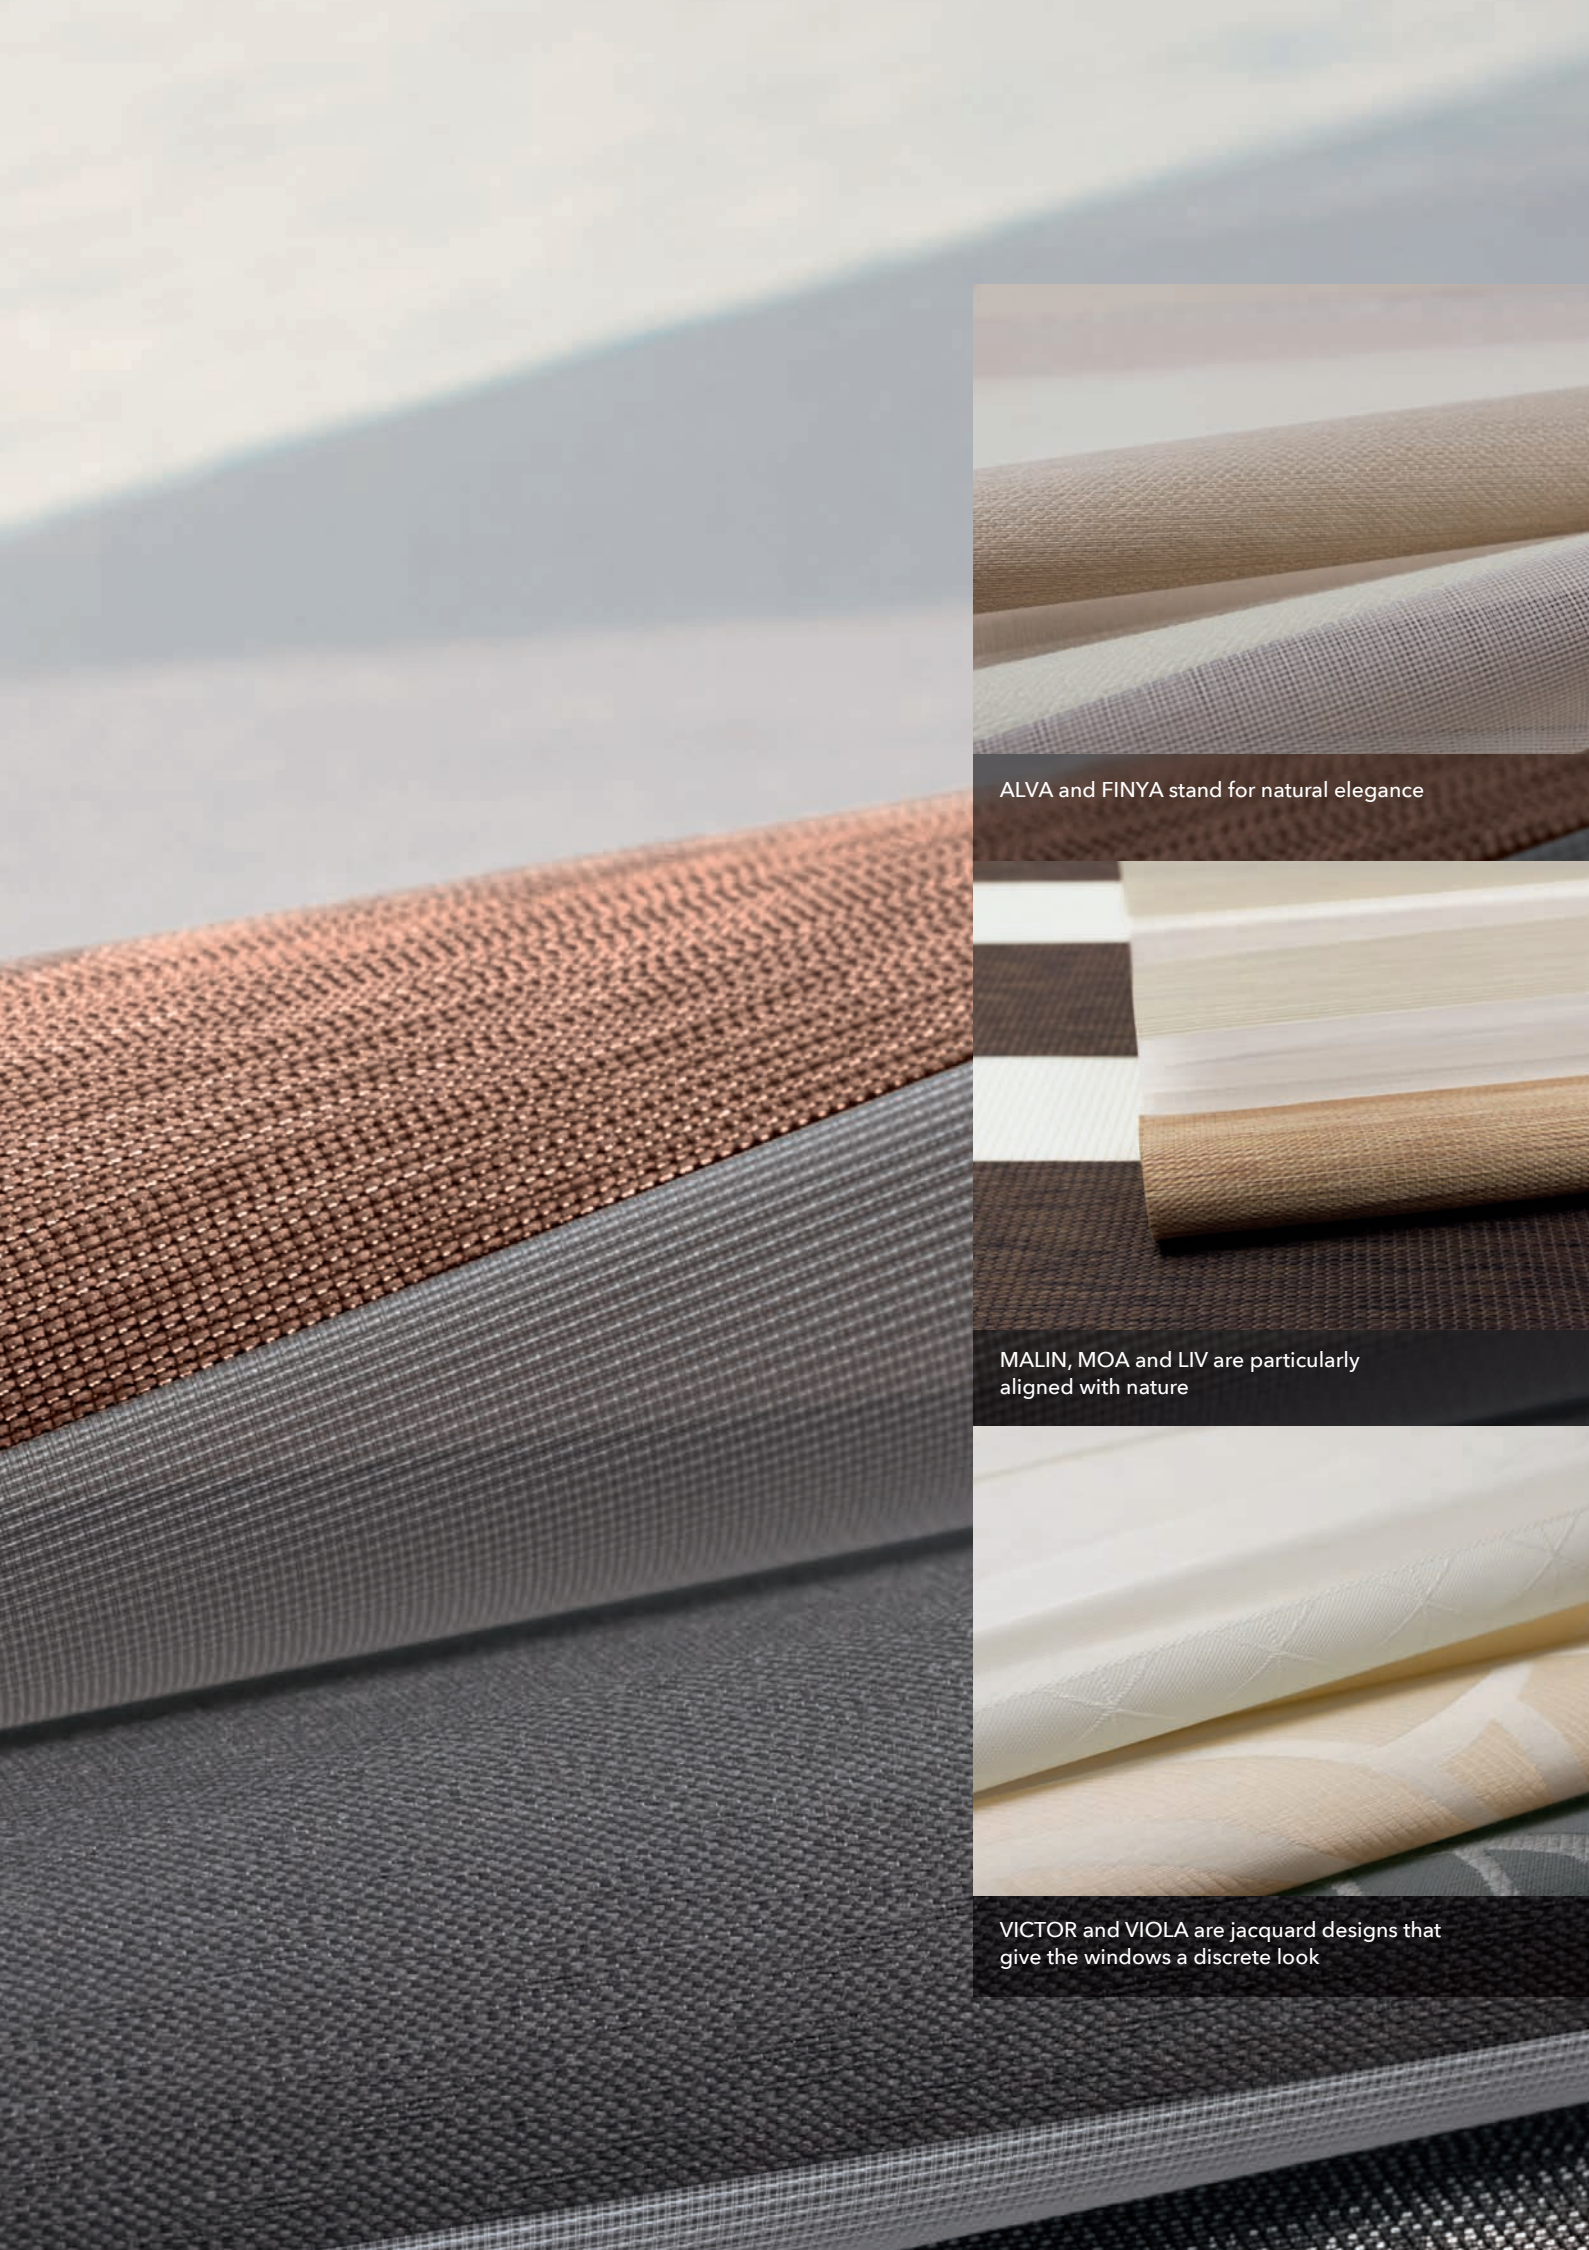

# Double Roller Blind Collection with high quality Standards

The MHZ Double Roller Blind Collection is comprised of over 80 fabrics with different designs, structures and material designs and two different stripe heights for perfect light, privacy and glare protection.

The majority of the fabrics are woven, died and treated in Germany. This is aligned with our philosophy of short transportation routes, strict quality control, absence of health risks and environmentally friendly and resource effective production.

ALVA and FINYA stand for natural elegance

MALIN, MOA and LIV are particularly aligned with nature

VICTOR and VIOLA are jacquard designs that give the windows a discrete look

## WAVES INSTEAD OF STRIPES

---

The double roller blind from a completely different perspective

The newly conceived double roller blind fabric LOLA is based on a special weave technology, which alternates a wave design of transparent and blackout fabric and is a very special textile fabric.

Through the operation of the hanging, not only can light and privacy protection be adjusted individually, but the overlapping of beautiful 3-D-effects are created, which bring forth the surprise of new designs. Textile art with light, that inspires.

Colour	taupe

# Flexible Light Guidance creates. Wellbeing

---

The double roller blind fabric AYLA in taupe creates a surface with its shining matt satin surface that brings out conscious contrast and is a consciously discrete interpretation of mixed materials.

PEACE and quiet

THE INCOMING LIGHT SOFTLY  
BREAKS THROUGH THE NATURAL  
ALVA FABRIC AND COVERS  
THE SPACE IN A PLEASANT FEE-  
LING OF HARMONY.
